

## ■ Features:

- Frequency range:  $\leq 1\text{GHz}$ ;
- Range of field strength calibration:  $7\text{V/m} \sim 61\text{V/m}$ ,  $122\text{V/m}$  (option)
- Accuracy of Field strength calibration:  $\pm 1\text{dB}$  ( $20^\circ\text{C} \sim 30^\circ\text{C}$ );
- This field strength calibrator is specially designed for EME Guard XS and AM40C
- Small TFT LCD to display the emission strength

- Two mode: Manual mode, generating fixed strength signal. Auto mode, generating specific strength signal periodically
- Put dosimeter onto the calibrator, keep the antenna right closed to the MARK
- Avoid the calibrate operation in the environment of high power RF radiation
- Please keep the calibrator over 1m away of human body
- Powered by 12V adaptor
